GLASS CONTAINERS
FOR TRADITIONAL OR SOLAR CANDLES

Interesting application
Non-standard use

GLOSS®

NEW LOOK OF GLASS LANTERNS BY HS GLOSS

We present our new catalogue of glass lanterns produced at our glassworks in Poniec.

We specialize in the production of glass products for almost 60 years. For several years, we have been focused on glass lanterns dedicated for candles (traditional or memorial).

Our products are perfect for outdoor use because they are made of good quality glass, resistant to various weather conditions, stable and durable.

The lanterns can be filled directly with paraffin and create unforgettable garden candles, and can also be used as covers for candle or LED inserts.

Garden applications:

- covers for candle and LED inserts
- mini garden and patio lanterns
- plant and herb containers (cut, potted, artificial)
- decorative tealight covers for outdoor gatherings

At home:

- minimalist candle holders
- tealight holders
- organizational containers (office, bathroom, living room, kitchen)
- decorative elements (holidays)
- vases
